		Ne kete preventiv perfshihet prokurimi dhe transporti i te gjitha materialete ne kantierin e ndertimit dhe ekzekutimi i te gjitha instalimeve elektrike ne perputhje te plete me te gjithe dokumentacionin pershkrimor dhe grafik si dhe te gjitha materialet e nevojshme ndihmese dhe te punimeve profesionale ne perputhje me rregulloret perkatese.			
		Procurement and transportation of all necessary material to the construction site and execution of all electrical installations fully in accordance with the enclosed project textual and graphical documentation, as well as all necessary auxiliary material and professional labor, in accordance with relevant regulations.			
		Te gjitha materialet e instalimeve do te jene te klasit te pare dhe ne perputhje me standartet CEI ose nderkombetare. Te gjitha punimet do te ekzekutohen nga specialistet perkatese dhe ne akordance te plete me rregullat teknike perkatese per keto lloj punimesh. Per tipe dhe prodhime te pajisjeve te vecanta ose materiale instalimi jane dhene informacione te hollesishme por nuk jane te detyrueshme. Kontraktori mund te instaloje pajisje dhe/ose materiale te tjera , me kusht qe pajisje te tilla te kene te njejtat karakteristika elektrike dhe te dizajnit si ato te percaktuara ketu te cilat do te verifikohen nga personi ekspert i investitorit- inxhinieri perkatese.			
		All installed material shall be of first class quality and in accordance with IEC or recognized international standards. All works shall be executed by expert labor and fully in accordance with relevant technical regulations for this type of works. Specified types and manufacturers of individual equipment parts or installation material are given as more detailed information and are not mandatory. The Contractor may also install other equipment and/or material, provided that such equipment has the same electrical and design characteristics as the specified equipment which shall be verified by the Investor's expert person - the Engineer.
